WORK EXPERIENCE

FULL-STACK DEVELOPER
PAETA | 2023

- I developed the entire backend of the application and completed 50% of the application's design.
- I worked with a relational database (MySQL) and the Flask web framework.
- The software was implemented on a local server.

FULL-STACK DEVELOPER
SmartCoop | 2023-Present

- I developed a cooperative software, responsible for the backend development and database management.
- I collaborated with two teammates responsible for design. Additionally, I managed the version control of the software.
- The project was primarily implemented using Flask, JavaScript, HTML, CSS, and MySQL.

TECHNICAL INTERNSHIP
Golabs | June 26, 2023 - June 30, 2023

- Technical internship of 40 hours at Golabs as a programmer.
- I focused on testing popular Headless CMSs such as Strapi and Contentful, as well as their integration with the Next.js framework.
